Programme at a glance

Duration **27 weeks**	Structure **7 phases**	Projects **7 builds**
Topic areas **14**	Level **Beginner to Advanced**	Batch language **Bengali, Hindi or English**

Who it's for

- Basic computer knowledge and enthusiasm to learn. No prior programming experience is required — we start from the fundamentals and build up gradually.
- Around 2–3 hours a day. Sessions are live, and every one is recorded with lifetime access if you miss it.
- Live sessions and 1:1 mentorship run in Bengali, Hindi or English. Course material is in English.

Month-by-month syllabus

7 phases over 27 weeks, 14 topic areas and 7 hands-on builds. Each phase below is what you cover and the project you finish.

1 **Foundations & Frontend Fundamentals** — Weeks 1–4 · Beginner to Intermediate

HTML5 & CSS3 Mastery · JavaScript (ESNext)

Project: *Build a responsive portfolio website using advanced HTML, CSS, and vanilla JavaScript with animations and interactive elements.*

2 **React & Modern Frontend** — Weeks 5–8 · Intermediate

ReactJS & The Ecosystem · UI Frameworks: TailwindCSS & MUI

Project: *Develop a feature-rich E-commerce dashboard with product listings, filtering, shopping cart, and user management.*

3 **Full-Stack with Next.js** — Weeks 9–12 · Intermediate

Next.js: The React Framework · Advanced Next.js Features

Project: *Create a full-stack blog platform with server-side rendering, static generation for posts, and CMS integration.*

4 **Backend Engineering** — Weeks 13–16 · Intermediate to Advanced

Node.js & Express.js · Databases: SQL & NoSQL

Project: *Build the backend for a social media application with user authentication, posts, comments, and real-time notifications.*

5 **DevOps & CI/CD** — Weeks 17–20 · Advanced

Version Control & Git Workflows · CI/CD & Infrastructure

Project: *Set up a complete CI/CD pipeline for a full-stack application with automated testing, building, and deployment.*

6 **Containers & Cloud** — Weeks 21–24 · Advanced

Containers: Docker & Kubernetes · Multi-Cloud Deployment

Project: *Containerize a microservices-based application and deploy it to a managed Kubernetes service on AWS or GCP.*

7 **Career & Interview Preparation** — Weeks 25–27 · Advanced

Data Structures & Algorithms · System Design & Interviews

Project: *Complete a series of mock interviews (technical, system design, and behavioral) and build a professional portfolio website.*

Where this course can take you

The programme prepares you for developer roles at product companies, IT services firms and startups:

Roles: Frontend developer · Backend developer · Full-stack developer · DevOps engineer
